

EUROPEAN ENERGY CONFERENCE - E2C

17 – 20 APRIL 2012, MECC, MAASTRICHT

THE EUROPEAN FORUM FOR ENERGY RESEARCH

Chaired by Prof. Harald Bolt, Forschungszentrum Jülich, Germany
Under the Patronage of Günther H. Oettinger, EU Commissioner for Energy

The European scientific community has the potential to provide the necessary interdisciplinary cooperation and communication in energy research, technology development and to support innovation by bringing together participants from science and industry.

There will be plenary lectures in the morning on overarching subjects of energy and associated climate research. The impact of this research on the transition of the European energy system towards sustainability will be the focus of the keynote lectures. On the last day of the conference the European dimension of research and development will be discussed with the audience by first rank panellists.

SPEAKERS INCLUDE

- DAY 1** **Javier Solana**, Former Secretary General of NATO
Steven Koonin, Science and Technology Policy Institute, USA
Bernard Bigot, CEA Chairman, France
Jeroen van der Veer, Former CEO, Shell, The Netherlands
- DAY 2** **Luis Atienza**, President Red Electrica de Espana
Peter Nagler, Evonik, Vice President Innovation, Germany
Dan Arzivu, National Renewable Energy Laboratory, USA
Alfred Voss, IER, University of Stuttgart, Germany
- DAY 3** **Martin Winter**, University of Muenster, Germany
James Barber, Imperial College London, UK
Andreas Wahner, Forschungszentrum Jülich, Germany
- DAY 4** **Remi Bastien**, Vice President, Renault, France
Francesco Romanelli, EFDA Leader
Osamu Motojima, Director General, ITER Organization

The biennial European Energy Conference series, launched in 2010, promotes, consolidates and communicates the vitally necessary synergy of scientific and technical competence with the awareness of environmental and social implications.

The conference will provide participants with a view on how the future of energy supply in Europe may develop. It will be the forum to define the role of energy science and research and it will provide the communication between scientists with industry and the public.

Specific symposia in the afternoons will cover the key fields which are essential for the development of our future energy system.

ENERGY SYSTEMS AND SUSTAINABILITY

Symposium Chairs: **Hardo Bruhns**, University of Heidelberg, Germany
Cayetano Lopez, CIEMAT, Spain

SCIENCES FOR ENERGY

Symposium Chairs: **Sven Kullander**, Royal Swedish Academy of Sciences, Sweden
Bengt Kasemo, Chalmers University of Technology, Sweden

PRIMARY ENERGY CONVERSION

Symposium Chairs: **Richard van der Sanden**, DIFFER, The Netherlands
Claude Degueldre, PSI, Switzerland
Claude Ayache, CEA Grenoble, France

ENERGY NETWORKS AND STORAGE

Symposium Chairs: **Teresa Ponce de Leao**, LNEG, Portugal
Martin Greiner, Aarhus University, Denmark

EFFICIENT END USE OF ENERGY

Symposium Chair: **Brigitte Bach**, AIT, Austria

The European Science Foundation (ESF), the European Materials Research Society (E-MRS) and the European Physical Society (EPS) are organising the 2nd European Energy conference on the basis of their common understanding that advances in research and development are urgently needed in order to accelerate the transformation of energy systems towards sustainability.

Ample space for exhibitions will be provided.
