

Dear colleagues,

we are pleased to inform you about the call for our first Anton Paar Research Award for Instrumental Analytics & Characterization. Contribute to shaping the future of instrumental analytics and characterization for a chance to win this research award with a monetary prize of Euro 20,000.

Founded in 1922 in Graz (Austria) by the locksmith Anton Paar, the company is the world leader in the measurement of density and concentration, the determination of dissolved carbon dioxide, and in the fields of rheometry and viscometry. Anton Paar's customers include the major beer and soft drink manufacturers worldwide as well as companies active in the food, chemical, and pharmaceutical industries. The corporation strives to combine high-precision manufacturing with the latest scientific achievements; the Anton Paar GmbH invests 20 % of the annual turnover in research. The Anton Paar Group is active in more than 110 countries with 29 sales subsidiaries and seven producing firms in Europe and the USA.

The application is open to anyone interested in chemical analysis or physical characterization. The focus should be on new methods and applications. Projects that are not published may also be submitted, provided the criteria are met. The deadline for entries is September 30, 2019. For more information and application feel free to check the attached pdf- file. You will also find all necessary information about the jury and the platform to apply at this link: <http://www.anton-paar.com/corp-en/research-award/>

We look forward to receiving numerous applications and exciting, innovative ideas. Please do not hesitate to contact us if you have any further questions.

Best regards
Gudrun Wölfel
